DP BIG filter housings

Big design filter housings for full-flow applications

Atlas Filtri DP BIG housings are specifically designed for cartridges with an outer diameter of 4.5" (from 4.0" to 4.5" applicable) and a pressure rating of 120 PSI.

Available with NPT tapered IN/OUT connections in 1" and 1 1/2", the housings adapt to any large capacity filtration or heavy duty application.

DP BIG housings are available in blue or clear sumps and are offered in 10" or 20" lengths. Head assemblies in the double and triple version are patented and uniquely designed as a single manifold unit. This exclusive design reduces labor costs and liability of water leaks, making installation faster and easier, saving both time and money.

Unique optional features include single, double and triple manifolds equipped with a drain port at the bottom of the housing and gauge connections at the top. Gauges and drain kits are offered separately, as needed for the design of the system.

All DP BIG housings are provided with a specially designed wrench to remove the housing sump from the head assembly as well as the drain plug from the bottom of the housing sump. An exclusive blue colored O-ring is used on the sump to ensure proper selections when servicing the filter. This avoids confusion in the market where a wrong competitive black O-ring is used and may be subject to leaks. A food grade lubricant called LubriKit is provided to properly lubricate the sump housing o-ring.

Atlas Filtri is driven to providing our customers with the best available products to meet their filtration requirements. This is done by using the most advanced manufacturing and design methods, which is why we can bring you the highest-pressure rating of any filtration housing on the market. The international patents received come from a constant commitment to research and develop that result in new and innovative products.

FEATURES

- MONO/single, DUO/double or TRIO/triple unique manifold heads.
- Optional gauge and drain ports.
- Metal Stand Frame available.
- Suitable for cartridges up to 4.5".
- Available in 10" and 20" lengths.
- Clear and blue sumps with same pressure rating at 120 psi.
- NPT connection ports 1" and 1 1/2".
- Pressure-relief feature includes an O-ring seal, no spring is used that can result in a water leak.
- Uniquely threaded wall mount bracket screw ports on all heads for ease of installation.
- Accessories included are a housing wrench and LubriKit for O-ring lubrication.

SPECIFICATIONS

Materials:

Heads: reinforced polypropylene.
Blue sumps: reinforced polypropylene.
Clear sumps: PET.
O-rings: EPDM.

Working conditions

for all versions of DP BIG housings:

Working pressure: Max 120 psi (8.3 bar).
Working temperature range:
Min 39.2°F (4°C) - Max 113°F (45°C).

CERTIFICATIONS

Housings certified by IAPMO RT to NSF/ANSI 42, 61, 372 - lead free, CSA B483.1. In compliance with drinking water regulations, USA and Canada.

PRODUCTS SPECIFICATIONS and PERFORMANCE

Listed PS PM models come with gauge plugs and drain plugs. Specifications apply also to unplugged models and to F models with floor stand FRAME.
